

## ALLGEIER'S INNOVATIVE SHOPPING TECHNOLOGY IN A BOX

LEARN MORE ABOUT OUR  
FUTURE RETAIL SOLUTIONS

FIT FOR THE DIGITAL AGE

### FUTURE RETAIL SOLUTIONS

THINK OUTSIDE THE BOXX

We invite you to experience the future of retail with the Allgeier IoT BoxX - an interpretation of the GO-concept.

All our retail knowledge and industry expertise is packed into this showcase; we demonstrate how the next generation shopping experience can look like.

Completely integrated in SAP this pop-up-store makes it possible to present the most important retail trends.

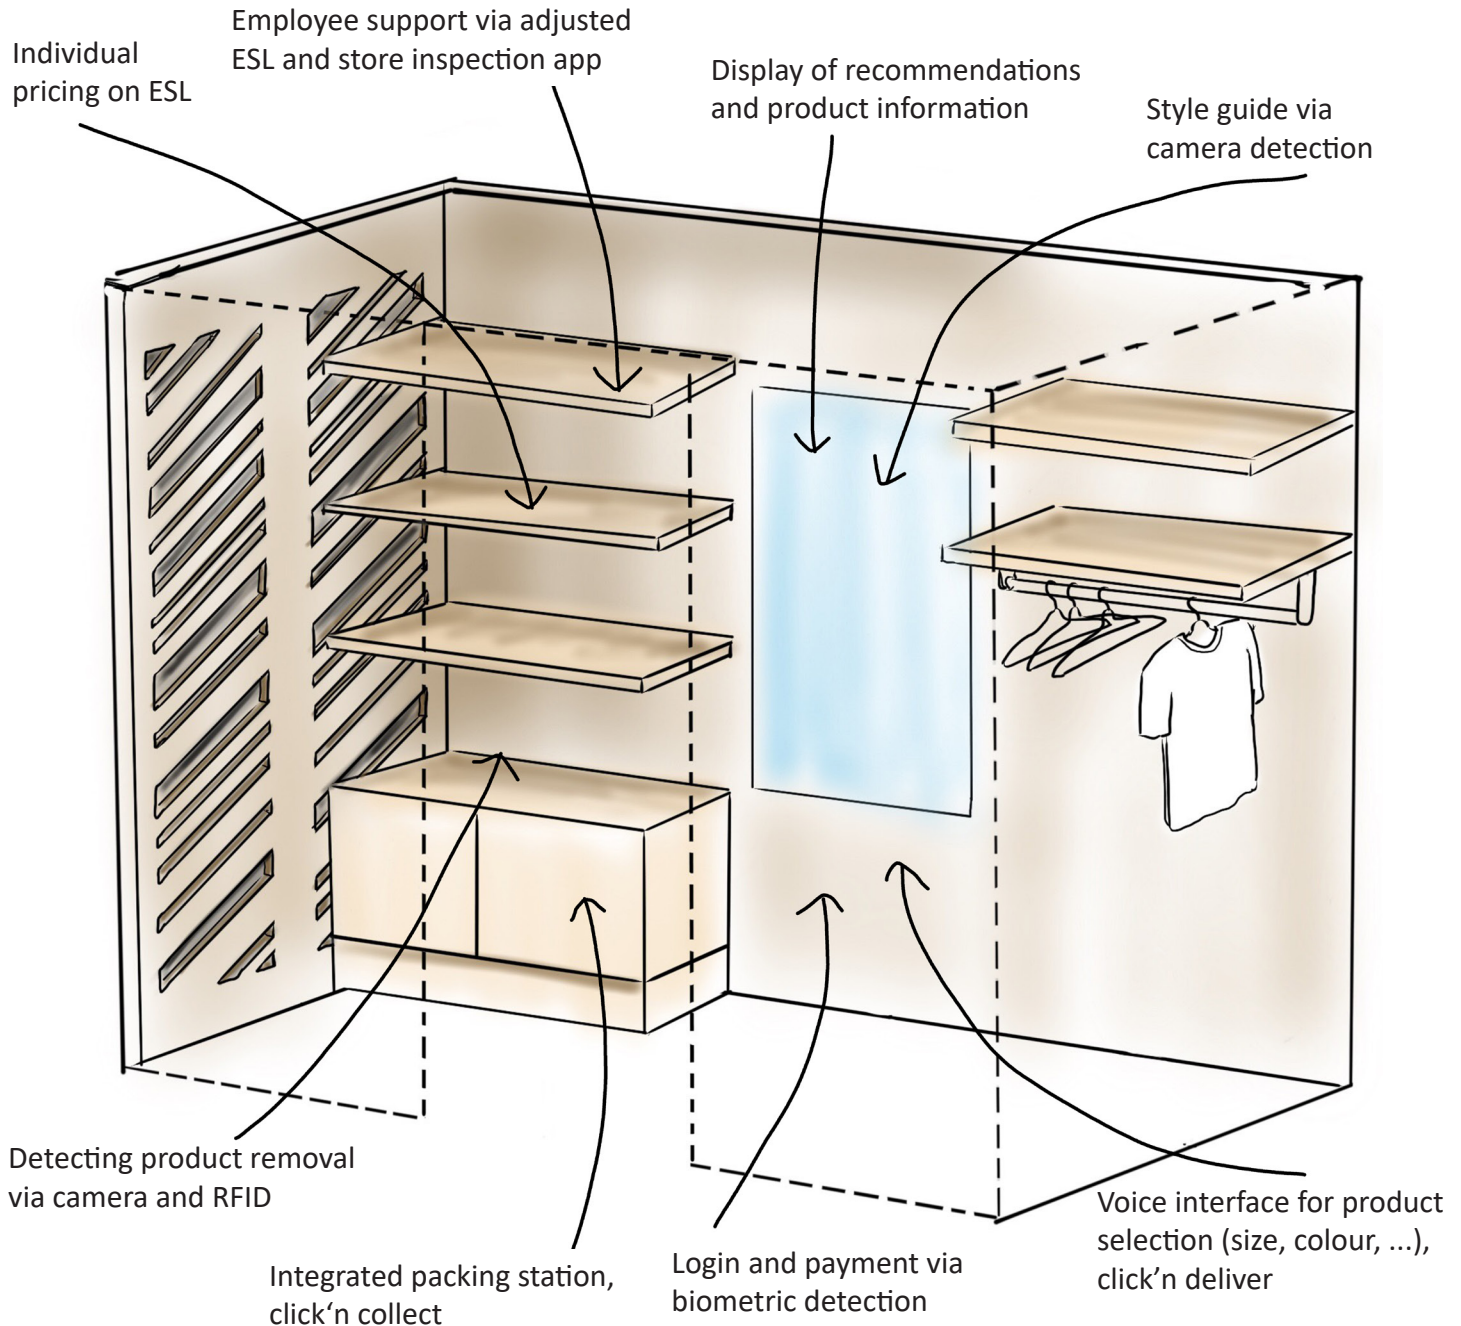

Based on S/4 HANA and SAP Leonardo, the shopping experience includes automatic checkout-process powered by camera and RFID, order creation by voice interface or dynamic pricing on electronic shelf labels.

The featured retail solutions are mostly already implemented today or will reach market maturity in the near future.

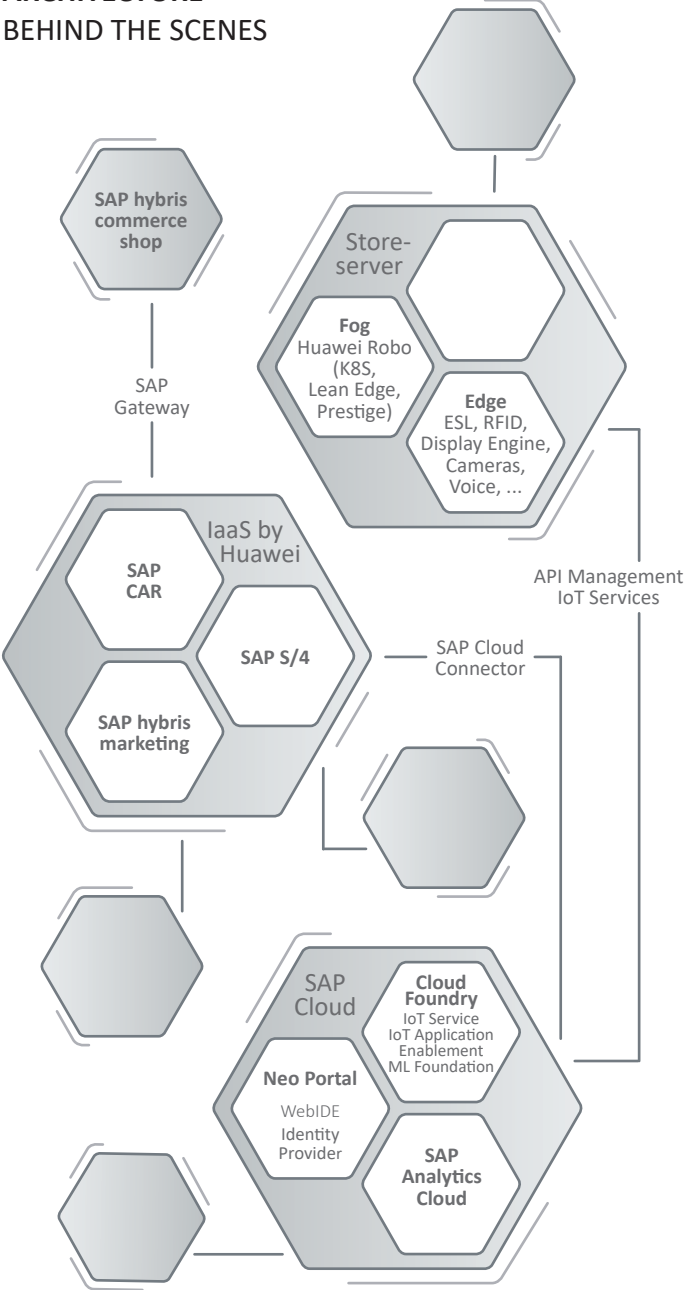

In cooperation with our clients and partners we continuously challenge ourself to fulfill the demands and wishes of the retailers and their customers.

Step into our retail world, be curious and get ahead!
